- Please refer to the Residential or Building Code of New York State for Story and Story Above Grade Plane definitions.
- In computing the square foot area, measurement shall be taken to the outside surfaces of exterior wall at each floor. Courts, yards, etc. shall be excluded.
- The term "height" of a structure shall mean the vertical distance from the curb level to the highest point of the roof beams. In the case of flat roof or to a point of the average height of the gable in the case of roofs having a pitch or more than one foot in four and one-half, except that in the case of a structure where the grade of the street has not been established or where the structure does not adjoin the street, the average level of all the ground adjoining such structure shall be used instead of the curb level.
- Total height shall be measured from 6 inches below the lowest finished floor to the outside of the roof, and in case of sloping roofs, to the average height.
- The cubical contents is the actual space enclosed within the outer surface of the outside walls and between the outer surfaces of the roof and six inches below the surface of the lowest floors. This includes the cube of dormers, penthouses, vaults, pits, enclosed porches, and other appendages. Outside steps, terraces, footings, courts, yards, light shafts, and buildings detached from main structure are not to be included. (Detached structures are to be separately computed).
